Summary

Software Developer with hands-on experience in Java, backend systems, and web technologies through internships and academic projects. Strong foundation in object-oriented programming, databases, and problem-solving with the ability to build efficient and scalable applications.

Education

B.Tech – Information Technology (Pursuing)

Panimalar Engineering College, Chennai

Expected Graduation: August 2027

CGPA: 8.6 / 10

Skills

Frontend: HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js

Database: MySQL, SQL

Language: Java

Coding Platforms: </> Leetcode, 🏠 HackerRank, 🐙 GitHub

Experience

Java Development Intern

August 2025 – September 2025

Oasis Infobyte (Remote)

Tools Used: Java, MySQL

- Developed Java applications using Core Java, OOPs, Collections, Exception Handling, JDBC, and MySQL following clean coding practices to ensure maintainable, efficient, and scalable solutions.
- Used SQL and Excel to manage and analyze data, generate reports, and support decision-making processes while collaborating effectively with team members in a remote environment.

Full Stack Web Development Intern

October 2024 – December 2024

Edu-versity (Remote)

Tools Used: HTML5, CSS3, JavaScript

- Built responsive and user-friendly web pages using **HTML, CSS, and JavaScript**, ensuring consistent layout, performance, and cross-device compatibility.
- Supported backend integration, debugging, and testing processes, contributing to seamless deployment and improved application performance and stability.

Projects

Instagram Clone | HTML, CSS, JavaScript, React

March 2025 – August 2025

- Built a responsive Instagram-inspired frontend with a navigation bar, posts feed, suggestions panel, stories section, and profile page featuring CRUD operations and dynamic UI components optimized for multiple devices.

College Website | HTML, CSS, JavaScript, Java

December 2024 – February 2025

- Contributed to the development of a college web portal using web technologies, supporting frontend implementation and backend integration for academic and administrative functionality.

Wastewater Energy Vehicle | Python, Java

November 2023 – January 2024

- Collaborated on the design and development of a sustainable energy prototype using wastewater, contributing to system planning, feasibility analysis, and basic performance testing.

Awards & Certifications

- **Programming in Java, NASSCOM**
- **Oracle Cloud Infrastructure 2025 Foundations, Oracle**
- **Java Developer Certification, Coursera**
- **Best Innovative Solution, AXIOMI 2026 Hackathon**
- **Mr. Xcelerate Winner, HACKXELERATE'26 Hackathon**
